## Recommendations on the Activities of UN-GGIM-AP WG2 on Data Sharing and Integration for Disaster Management

- Be clear on purpose – data sharing or common tools and methods?
- Be clear on success criteria for the working group:
  - Prototype?
  - Template?
  - Operational system?
- If we are aiming for common tools and methods we need
  - Data with some basic common characteristics
  - Common service standards with compliant standard implementations
  - Library of tools to select from
